

IN THE CLAIMS

1-4. (Canceled).

5. (Currently amended) The ~~panel of claim 4~~ liquid crystal display of claim 16, wherein the transparent color filters includes transparent photosensitive material or acrylic material.

6-15. (Canceled).

16. (Currently amended) A liquid crystal display comprising:

- a first substrate;
- a plurality of gate lines formed on the first substrate;
- a gate insulating layer formed on the gate lines;
- a semiconductor layer formed on the gate insulating layer;
- an ohmic contact layer formed on the semiconductor layer;
- a plurality of data lines formed on the gate insulating layer and intersecting the gate lines to define a plurality of pixel areas;
- a first protective layer formed on the data lines;
- a plurality of red, green, blue and transparent color filters formed on the first protective layer;
- a second protective layer formed on the color filters;

a plurality of pixel electrodes formed on the second protective layer, each of the pixel electrodes being connected to the data lines through the semiconductor layer, each of the pixel electrodes being formed on the red, green, blue, and transparent color filters, respectively;

a second substrate facing the first substrate;

a common electrode formed on the second substrate; and

a liquid crystal layer interposed between the first substrate and the second substrate,

wherein the pixel ~~electrodes formed on~~ areas corresponding to the blue filter and transparent filter ~~have a~~ are smaller ~~area~~ than the pixel ~~electrodes formed on~~ areas corresponding to the red or green filters.

17. (Original) The liquid crystal display of claim 16, wherein the liquid crystal layer has a vertical alignment with respect to the first and the second substrates.

18. (Original) The liquid crystal display of claim 17, further comprising a plurality of protrusions formed on the common electrode and made of organic material, wherein the pixel electrodes have cutouts.

19. (Original) The liquid crystal display of claim 16, wherein the liquid crystal layer has a twisted alignment.

20. (Original) The liquid crystal display of claim 16, further comprising a black matrix disposed on the first substrate and defining the pixel areas.

21-33. (Canceled).
